DETAILED ACTION

Allowable Subject Matter

1. **Claims 1-15** are allowed.

The following is an examiner's statement of reasons for allowance:

With regard to claims 1, 2, 4-5, 8 and 12: These claims are allowable over the prior art of record because the latter, either alone or in combination, does not disclose nor render obvious a process of forming opto-vias comprising drilling via holes in copper laminates, plating the inner walls of the holes, exposing and etching the upper and lower sides of the laminates to form circuit patterns, layering the laminates on each other using an insulating resin that fills the space between the laminates and via holes, removing the resin from the via holes and forming an optical waveguide or both electric-via or opto-via near the via holes or using epoxy resin with 95% or more light transmission or another method of forming vias comprising forming copper clad laminates with circuit patterns, layering them on top of each other, drilling electric and opto-vias holes, plating the holes, etching both sides of the laminates and drilling additional opto-vias in the order as disclosed in the claims or positioning a waveguide through each opto-via in a structure formed by stacking a plurality of copper clad laminates with circuit patterns and plated via holes using a resin adhesive and removing the resin to form vias, in combination with the rest of the claimed limitations.

With regard to claims 3, 6-7, 9-11 and 13-15: These claims are allowable over the prior art of record because they depend from allowable claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Magnuson et al (US 2002/0195716 A1) and Kang et al (US 2003/0169038 A1) are further pertinent to the state of the art.
